

MAKE YOUR OVEN MAKE BETTER GLASS

FORDROLL TEMPERING OVEN ROLLERS

Your customers depend on you for the highest quality, most reliable tempering ovens. That's why you should choose **FORDROLL rollers** as standard equipment. FORDROLL rollers mean business...for you and for your customers.

FORDROLL rollers are built and tested to ensure quality and durability:

- Manufactured from the best fused silica castings
- Tested for porosity, thermal shock resistance, flexural strength, density, surface quality, impact strength, and thermal stability
- Surface finished with our exclusive **FR-I MicroFinish process**.

Manufacture to TIR (Total Indicator Runout) that meets your exacting specifications for any size roller, and the use of the exclusive **FORDLOC End Cap System** mean the truest-running operation. These long-life end caps are guaranteed to eliminate wave distortion caused by loose end caps. And the cost of these rollers is competitive with other, less reliable designs.

George Ford & Sons has the manufacturing capacity to match your production requirements, with predictable, on-time delivery a longstanding tradition and commitment.

FORDROLL conveyance rollers can make your ovens, and your sales and profits, better. Contact George Ford & Sons for more information.
